

About Us

San Gabriel Mountains Heritage Association is a 501(c)3 nonprofit organization dedicated to conservation education. Through a participating agreement with the Angeles National Forest we provide programs for schools, scouts, and community groups at two Forest Service educational facilities. Our volunteers also staff front counters at visitor information centers, and help with the maintenance of public exhibits and educational materials.

A Program Manager coordinates our day-to-day programs, but our volunteers comprise the lifeblood of our organization. Managed by a small board of directors, we form a cross section of our local communities: retired educators and business professionals. The uniting factor for all is a deep appreciation of our local mountain ecosystems and the belief that education instills the experience and appreciation required to advance the preservation of our San Gabriel Mountains landscapes.
